

List of parts

Title	Number
① Gasket, PUR or HE/CR	2
② Cover, PA	1
③ Outer fixing straps, PES	7
④ Pleated media	1
⑤ Bottom, PS	1

Necessary accessories:

Reusable support cage 218/1500

Optional: Pulse-jet-deflector PJR 218

Type **LP 218 G 15 A 75 09**

Filter medium:	FE 2509-01, PP	Filter surface:	7.5 [m ²]
	Supporting nonwoven	Height of cartridge H:	1505 [mm]
Number of pleats:	79	Depth of pleats:	32 [mm]

Filter cartridges for dust removal according to our separate application guidelines

- For mounting from upstream- or downstream-side.
- Recommended **diameter for mounting** down-stream-side: **225 mm**.
- Distance spacers of the cover to optimise the compression of the gasket.
- Centering ring of the cover to protect the filter media from damage.
- Filter media fulfils dust class M according to DIN EN 60335-2-69 annex AA.

The values given are mean values with tolerances resulting from normal production fluctuations.
Our explicit written confirmation is always required for the correctness and applicability of the particulars involved in any individual case.
