

List of parts

Title	Number
① Gasket, PUR or HE/CR	2
② Cover, PA	1
③ Outer straps, PES	0
④ Pleated media	1
⑤ Bottom, PS	1

Necessary accessories:

Reusable support cage 324/600

Optional: Pulse-jet-deflector PJR 324

Type **LP 324 G 60 B 77 21**

Filter medium:	FE 2521-01, Polyester + PTFE membrane	Filter surface:	7.7 [m ²]
Number of pleats:	135	Height of cartridge H:	605 [mm]
		Depth of pleats:	48 [mm]

Filter cartridges for dust removal according to our separate application guidelines

- For mounting from upstream- or downstream-side.
- Recommended **diameter for mounting** down-stream-side: **330 mm**.
- Distance spacers of the cover to optimize the compression of the gasket.
- Centering ring of the cover to protect the filter media from damage.
- Filter media fulfils dust class M according to DIN EN 60335-2-69 annex AA.

The values given are mean values with tolerances resulting from normal production fluctuations.
Our explicit written confirmation is always required for the correctness and applicability of the particulars involved in any individual case.
